3	CHAIRPERSON BERRY: The meeting will come
4	to order.
5	I. Approval of Agenda
6	CHAIRPERSON BERRY: The first item on the
7	agenda is the approval of the agenda. Could I get a
8	motion to approve the agenda? And then I'll see if
9	there are any changes.
10	VICE CHAIR REYNOSO: So moved.
11	CHAIRPERSON BERRY: Can I get a second?
12	And then we'll discuss it.
13	COMMISSIONER REDENBAUGH: Second.
14	CHAIRPERSON BERRY: Okay. Commissioner
15	Lee?
16	COMMISSIONER LEE: Madam Chair, can I add
17	an agenda item to discuss the U.S. China relations,
18	how it may impact the Asian American community?
19	CHAIRPERSON BERRY: Okay. U.S. China
20	Relations and Impact on the Asian American Community.
21	Okay. And I would like to add an item
22	concerning the Alaska Federation of Native Americans,
23	and a resolution submitted to us by our State Advisory
24	Committee concerning that subject.
25	And I would also like to add an item

2	week, which is called the Sandoval case.
3	All right. With those does anyone
4	else have anything else they'd like to add? Okay.
5	With those additions, can we get approval of the
6	motion with those additions? All in favor indicate by
7	saying aye.
8	(Chorus of ayes.)
9	Opposed?
10	(No response.)
11	So ordered.
12	II. Approval of Minutes of
13	April 13, 2001 Meeting
14	CHAIRPERSON BERRY: The next item is the
15	minutes of the April 13, 2001 meeting. Commissioner
16	Edley asked that we add that he was late but he was at
17	the briefing, but we're not going to add it because he
18	wasn't at the meeting. He was not at the business
19	part of the meeting, which is the part that counts.
20	But we will note for the record that he
21	did show up at the briefing. He had been in
22	California at some meeting, a meeting of the
23	Commission that President Ford and Carter are chairing
24	in reference to electoral stuff, to which he has been
25 <u></u>	added as a member, and came back on the red-eye on

2	meeting, so but we will so note that he did come in
3	during the briefing not in the minutes, but I'm
4	just telling you that.
5	The other thing is that anybody else
6	have anything to add to the minutes? Okay. So could
7	I get approval of the minutes? I need a motion. Did
8	I ask already?
9	VICE CHAIR REYNOSO: Yes.
10	CHAIRPERSON BERRY: All those in favor
11	indicate by saying aye.
12	(Chorus of ayes.)
13	Opposed?
14	(No response.)
15	So ordered.
16	III. Announcements
17	CHAIRPERSON BERRY: Announcements. The
18	first announcement is I am deeply, deeply saddened to
19	announce that Deric Newton, a member of our staff, a
20	young man 28 years old, who worked very diligently in
21	the Office of Human Resources and other offices in the
22	Commission, including some work with Krishna, passed
23	away on Saturday, April 28th. He would have been with
24	the Commission for a year on May 29th, and he will be
25	greatly missed by everyone who came into contact with

him here at the Commission. So that's the first 1 Some of you may have seen him here, announcement. 2 Commissioners, when you came to meetings. 3 Also, to announce that Leon Sullivan, a 4 major giant in the cause of human rights and social 5 justice, passed on April 24th at a hospital in 6 Scottsdale. He had been ill for a while. Leon first 7 came to prominence in the 1960s when he organized 8 economic boycotts against Philadelphia companies that 9 refused to have black workers, and he was pastor of 10 Philadelphia's largest church for 38 years. 11 He is well known for developing a code of 12 13 conduct for corporations in dealing with apartheid in Africa that became known the Sullivan 14 South as

Principles. These principles were very important in trying to equalize conditions there. They didn't work totally because that's why we all started the Free South Africa movement, ended up having sanctions.

But Leon worked very closely with that movement, and the principles were important as a stage of consciousness-raising about these issues, and did improve conditions of life for many people. So he's a giant. He was a giant, and he is gone.

And the next announcement is that, on a more mundane level, but a very important one, our

8 Director of Human Resources here at the Commission, 1 Catherine Gates -- Cathy -- decided to take a new job 2 with the Department of Agriculture. So that means 3 that the Staff Director has to find a new Director of 4 Human Resources. And we, of course, wish Cathy the 5 best in her future endeavors. 6 The other item is that May is Asian-7 Pacific-American Heritage Month, and the Commission 8 has sent out the press release. We do press releases 9 on this subject -- on these subjects -- and we'll be 10 conducting activities to celebrate this month. 11 Does Okay. Those are announcements. 12 anyone else have an announcement that they would like 13 If not, then we will go on to the 14 to make? Okay. next item -- well, before we get -- well, let's do the 15 Staff Director's report. 16 17 IV. Staff Director's Report CHAIRPERSON BERRY: The only thing I will 18 mention to you under the Staff Director's report, 19 20 since it happened between the last meeting and this one -- I'll mention two things. One is the -- last 21 week, I think it was last week, I issued a statement 22 in my own name as Chair reiterating the Commission's 23 policy of not demonizing Americans who are descended 24 25 from various immigrant groups because of activities NEAL R. that involve the country of their origin. 1 Commission has, 2 The over the years, issued such statements routinely. We did it during 3 the various terrorist activities in which Arab-4 Americans were demonized and had a lot of problems 5 because people thought that since they were Arab-6 Americans and the countries were Arab that 7 thev 8 somehow automatically ought to be kept off airplanes and denied service in restaurants and various things 9 10 happened to them. We issued a statement saying that that's 11 not something that we would hope people would do. 12 We've done it before in terms of Asian Americans 13 14 around the campaign finance issues, and so all the 15 statement basically said was to remind people that 16 this is not the kind of thing that -- that people do 17 not bear the burden of being somehow harassed because 18 they happen to be descended from some particular 19 So I did that last week. foreign population. 20 The other thing that I want to do under 21 the Staff Director's report, because it is an ongoing 22 part of what we at the Commission have been doing, is 23 to see if I can get agreement to issue a statement for 24 the Commission commending the State of Florida for 25 passing the legislation which has been reported in the

news concerning the allegations of voting problems in Florida.

And I think that it's very important that 3 the Commissioners feel comforted that they are taking 4 the time to go to Florida and spend that time going to 5 hold hearings, to keep the spotlight on this issue. 6 7 It was not in vain. And that the Commissioners feel comfortable that the timeliness of our status report 8 at a time when the Speaker of the House down there had 9 been quoted as saying that not much was going to 10 happen on this issue -- it wasn't a priority -- was 11 timely. 12

And you know -- Commissioners who have 13 been here for a while know, and others may know from 14 reading it, that the Commission's impact comes in many 15 And that very often when we hold hearings 16 ways. 17 people qo out to do whatever it is we're holding before we ever do the report in 18 hearings about response to the public exposure, depending on how much 19 public exposure there is. And we're always very happy 20 21 about that.

Reporters have said to me, "Well, aren't you disappointed if somebody does what you guys want them to do before we get the report done?" And we say, "No. If they do it, we're happy. If they don't

1	do it, you know, we'll still, you know, urge them on."
2	So I think it's great. It's a great day.
З	When I heard this last night I went out and
4	celebrated that they had done this. But we also know
5	here, as Commissioners, that the devil is in the
6	details. And we also know that the devil is in the
7	implementation. We've learned that from all of our
8	reports all these years and from our monitoring.
9	So I think that commendations all around
10	are in order, and I think that we should note the
11	areas we don't even need to note at this time the
12	areas that are still a concern. We'll wait until we
13	get the report.
14	But I think that our earlier decision to
15	go to Florida if they did not do something, that we
16	don't need to go to Florida because they didn't do
17	anything, because they have at least passed the
18	package, I've been told by General Counsel, but
19	they've not voted on it. They've had a conference
20	committee, and they have not approved the necessary
21	appropriation, he said. He said that should occur
22	today, and that county commissioners must also approve
23	funding.
24	So I think that with those caveats in
25	mind, which, you know, we always have to be cautious,

1	and with the idea that we would still go to Florida
2	we would still go to Florida, again, once
3	implementation has started of whatever they pass, and
4	that we will have it all analyzed by the time we do
5	our report.
6	I think that we should commend them for
7	having passed some legislation that dealt with some of
8	these issues, and I think that we should do that.
9	So if there are people who object does
10	anyone object to our doing this? There is no
11	objection? Okay. Without objection, then, we will
12	have a statement which says what I said, which is that
13	yes?
14	VICE CHAIR REYNOSO: Madam Chair?
15	CHAIRPERSON BERRY: Vice Chair?
16	VICE CHAIR REYNOSO: I understand that
17	among the provisions that are being passed by the
18	Florida legislature includes a provision for a
19	provisional ballot, which I had thought would be one
20	of the most important things that could be done in
21	Florida in light of the types of problems that they
22	had in voting. So I'm very encouraged by that.
23	CHAIRPERSON BERRY: Yes, Commissioner
24	Thernstrom?
25	COMMISSIONER THERNSTROM: I would I'm
	NEAL R. GROSS COURT REPORTERS AND TRANSCRIBERS 1323 RHODE ISLAND AVE., N.W. (202) 234-4433 WASHINGTON, D.C. 20005-3701 www.neairgross.com

l	a little more comfortable in kind of voting on
2	statements from the Commission. I did agree to this,
3	because, in principle, I do agree. But I am a little
4	more comfortable when I see the exact wording of
5	statements that go out.
6	And I would like also to have seen the
7	statement that you issued a few days ago. So that if
8	we could you know, I like to sign my name to things
9	I see, just in principle. So if that was if that
10	process is possible, I would very much like it.
11	CHAIRPERSON BERRY: Well, I was going to
12	ask that someone go off and try to that was my next
13	try to draft up something.
14	COMMISSIONER THERNSTROM: Okay.
15	CHAIRPERSON BERRY: And bring it back to
16	us to see, while we're having this meeting
17	COMMISSIONER THERNSTROM: Good.
18	CHAIRPERSON BERRY: I was hoping.
19	COMMISSIONER THERNSTROM: Okay.
20	CHAIRPERSON BERRY: When I say that for
21	the Commissioners, and it's a statement that I would
22	like us to issue, that's what I usually would do
23	ask people to go write something and hope that they
24	bring it back while we're here.
25	COMMISSIONER THERNSTROM: I see. But you

2	CHAIRPERSON BERRY: Right. Which you did

5	had that Chairperson Berry believes blah, blah,
6	blah, blah, blah.
7	COMMISSIONER THERNSTROM: I see.
8	CHAIRPERSON BERRY: But this is
9	consistent with the Commission's already-established
10	
11	COMMISSIONER THERNSTROM: I see. Right.
12	CHAIRPERSON BERRY: policy.
13	COMMISSIONER THERNSTROM: Right. Okay.
14	CHAIRPERSON BERRY: So all it was was the
15	policy of the Commission.
16	COMMISSIONER THERNSTROM: I see.
17	CHAIRPERSON BERRY: Reiterating it. And
18	I was very aware that I was not asking the Commission
19	to reiterate or make a new policy.
20	COMMISSIONER THERNSTROM: Okay.
21	CHAIRPERSON BERRY: And that is why it
22	says Chairperson Berry. If you will take a moment to
23	just look at it, you will see that that's what it
24	says. Okay.
25	So could somebody go off could you go

It doesn't have to be long. 5 Is there anything else on the 6 Okay. Staff Director's report? Yes, Commissioner Lee? 7 8 COMMISSIONER LEE: Thank you, Madam I want to thank the Staff Director and the 9 Chair. staff for submitting all these reports that we have 10 asked for. I have a question regarding the Department 11 of Energy's report to us. My understanding was we 12 requested the Inspector General at DOE to give us a 13 report not only on racial profiling but also on 14 15 specifically the Wen Ho Lee Case, and he did not send any information on that matter. 16 17 CHAIRPERSON BERRY: Staff Director, you 18 sent these memos to the Commissioners? 19 STAFF DIRECTOR JIN: Yes, I did. 20 CHAIRPERSON BERRY: Okay. Did you 21 actually get them? 22 COMMISSIONER LEE: Yes. 23 CHAIRPERSON BERRY: The ones that he 24 sent? 25 COMMISSIONER LEE: Yes. **NEAL R. 1	STAFF DIRECTOR JIN: I think
2	CHAIRPERSON BERRY: I didn't know when
3	they were sent.
4	STAFF DIRECTOR JIN: Right.
5	CHAIRPERSON BERRY: Could you answer
6	Commissioner Lee's question, please?
7	STAFF DIRECTOR JIN: I'll have to look
8	into that, to be honest with you. I thought that
9	I'll just have to look. Can we get back to this?
10	Terri, can you help me out on this? Is
11	this responsive to what we sent to Department of
12	Energy, or
13	MS. DICKERSON: What I understood was
14	that the letter that they the response that they
15	gave had not been responsive in terms of sending an IG
16	report. And so what we were attempting to do was to
17	get a copy of that report, which has been released,
18	and to summarize that.
19	STAFF DIRECTOR JIN: Okay. I mean, do we
20	have an understanding that there is a you did a
21	specific investigation, the IG did a specific
22	investigation of the Wen Ho Lee matter? Is it still
23	outstanding?
24	CHAIRPERSON BERRY: I thought they
25	already did the excuse me for interrupting. But my
	NEAL R. GROSS COURT REPORTERS AND TRANSCRIBERS 1323 RHODE ISLAND AVE., N.W. (202) 234-4433 WASHINGTON, D.C. 20005-3701 www.nealrgross.com

17 recollection was from our discussions here previously 1 2 was that they had already done a report on the Wen Ho Is that correct? 3 Lee matter. COMMISSIONER LEE: And we wanted a copy. 4 I think we had asked for a copy. 5 CHAIRPERSON BERRY: They never gave it to 6 7 us? MS. DICKERSON: 8 There were two reports. 9 One was the task force report that --10 COMMISSIONER LEE: No, that wasn't it. 11 MS. DICKERSON: I'm sorry. The task 12 force report, which was issued in December that I had 13 forwarded, and then the second part was the IG 14 investigation, which was just released in April. So both of those were forwarded. 15 STAFF DIRECTOR JIN: 16 What we'll do is 17 we'll check with them again to see if they have 18 another outstanding report, especially on the Wen Ho 19 Lee matter. The impression that I think we had gotten 20 was that this was included in what they had on racial 21 But we'll check that again. profiling. 22 CHAIRPERSON BERRY: Okay. So the answer 23 is we don't have it, or we do have it, or that we will 24 have it? What's -- it's unclear. 25 STAFF DIRECTOR JIN: Yes, it's unclear to **NEAL R. 1	us at this point. I think I thought we had we
2	thought we had everything, but we could be wrong. We
3	will check on that.
4	CHAIRPERSON BERRY: Okay. Is that all
5	right with you?
6	COMMISSIONER LEE: Okay.
7	CHAIRPERSON BERRY: Does anyone have any
8	questions about any of the other things either the
9	Staff Director sent you or how about the situation
10	in Cincinnati? We discussed it last time. I sent a
11	letter to Mayor Luken, which I assume you sent to the
12	Commissioners, expressing concern about the and
13	reminding mainly just reminding him of the SAC
14	report that we did on events in Cincinnati that came
15	out years ago, and the report that we did on
16	revisiting who is guarding the guardians.
17	Do you have any information that you'd
18	like to
19	STAFF DIRECTOR JIN: Yes. In terms of
20	kind of the latest in Cincinnati, I did talk to the
21	Regional Director yesterday. And she has been in
22	fairly constant contact with the Director of Community
23	Relations Service at Department of Justice. And CRS
24	has been very active, having a presence in Cincinnati
25	directly working with the various communities there as
	NEAL R. GROSS COURT REPORTERS AND TRANSCRIBERS 1323 RHODE ISLAND AVE., N.W. (202) 234-4433 WASHINGTON, D.C. 20005-3701 www.nealrgross.com

well as working with the various different departments and community groups there.

Ι tell, Ι think And from what can 3 everybody is kind of waiting right now to see if the 4 police officer who shot and killed the young man, 5 Timothy Thomas, is going to be indicted. There is 6 some anticipation that that might happen at any point, 7 and there is anticipation as to what -- you know, what 8 would happen, depending on the -- whether the decision 9 to indict is affirmative or not. 10

The sense I get is that Civil Rights 11 Division at Department of Justice is there in fairly 12 They are particularly looking at this --13 full force. 14 after the funeral for Mr. Thomas. A woman was shot by a bean bag pallet by one of the police officers, and 15 is being fairly 16 apparently that thoroughly 17 investigated by Civil Rights Division. And the sense 18 I get is that Justice is fairly involved there in 19 different capacities.

I think one of the things that -- in terms of my talking to -- to Ms. Davis that seemed to be concerned -- of concern to perhaps both of us is the people that are in the field for the CRS or others. There seems to be some feeling that a lot of issues that we raised in the 1981 State Advisory

20 Committee report seem to be the same issues that are , 1 there now, and that it appears that a lot of the 2 issues have perhaps not even been addressed, much less 3 I think that's something that was of resolved. 4 5 concern. In terms of what the Commission might 6 want to do at this point, I think in terms of my 7 conversations with Ms. Davis, I think the feeling is 8 9 there is a lot of people there right now. There seems to be a lot of activity. Perhaps the best thing to do 10 is continue to closely monitor and see what happens in 11 the next few months, and then we will have more 12 information for the Commission to kind of assess at 13 14 that point. CHAIRPERSON BERRY: Okay. Does anyone 15 have anything else on the Staff Director's report? 16 17 Alaska Federation of Native V. 18 Americans and SAC Resolution All right. CHAIRPERSON BERRY: Okay. 19 Why don't we consider, first, 20 Then we will move on. the issue of the Alaska Federation of Natives that I 21 had said that I would like to raise. 22 I have been very aware for some time of 23 the interest of the Alaska Federation of Natives and 24 25 Native Americans in Alaska in having the Commission **NEAL R. And that the legislature hasn't stepped forward to do anything, which has disappointed them. That the House of Representatives passed a resolution which said that they condemn hate crimes, but the Senate insisted on a watered-down version that condemns only something called unlawful acts of discrimination.

9 And they regard this as an example of 10 what they're up against. And the resolution is in a 11 conference committee, and they don't believe it's 12 going to pass.

Since October 2000, at least five Alaska 13 native women have been raped in Anchorage. And since 14 six women of color have been murdered 15 1999. in Four of these crimes remain unsolved. 16 Anchorage. An 17 Anchorage Police Department crime report shows that, 18 between '95 and 1999, 42 percent of the rapes 19 committed in Anchorage victimized Alaska Native women.

The Alaska Natives I think are, what, one-sixth of the population? Is that right? So that gives you some -- I don't know what the percentage is in Anchorage, but it's one-sixth in the whole state. The rate of violent victimization among American Indians, including Alaska Natives, is more than twice

continually compromised. And their basic right to govern themselves and their villages is under challenge.

And they believe that an environment has 4 been created in which individual acts of private 5 hatred occur with increasing frequency. State public 6 policy, controlled by an urban, mostly non-native, 7 majority in the legislature, had set about reducing 8 public expenditures at any cost. And the resulting 9 10 policy decisions have diminished the quality of life for all Alaskans, but it has fallen most heavily on 11 12 Alaska's native villages, which are rural villages.

And they believe that the state knowingly risks the safety of rural residents and invites environmental damages to its own lands and waters because it doesn't upgrade or replace deteriorating bulk fuel storage facilities in native communities.

They look at legislation that forces the closure of village schools in defiance of a mandate under the constitution to educate all of the state's children. About 20 local schools have been forced to close.

They look at the lack of construction and maintenance of rural schools serving native students on the same basis as urban schools, which has recently

The pay for village public safety offices is so low that some qualified and receive food stamps in order to feed their families. Eighty-eight offroad villages have no local police, yet the state House rejected the governor's request to include a 15 percent salary increase and 20 new village public safety officers.

And the legislature has blocked federal 12 disaster aid to Western Alaska villages hit hard by 13 well other federal collapses, as as 14 fisheries initiatives that require state contributions. At the 15 the legislature has found millions of 16 same time, 17 dollars to fight tribal governments in the villages judicial assaults against federal 18 and mount subsistence protections, and support the imposition of 19 English as the only language of Alaska's public 20 21 institutions.

And they think that the most fundamental danger to their survival is the decade-long political attack by the state on the traditional subsistence -hunting and fishing rights of the villages. The

that they don't understand And that 4 requiring Alaska's indigenous people to change their 5 6 traditional values and ways of life in order to be 7 assimilated into mainstream society -- in short, to 8• disappear in their view is policy of а discrimination. 9

10 Despite the goodwill of many individual Native Alaskans, much of the public debate 11 over 12 subsistence remains, in their view, a thinly-veiled 13 exercise in racial intolerance. The legislature claims that Alaska Native villages should not depend 14 15 upon the state to finance local operations, but pay their own way, and that that ignores the fact that all 16 17 Alaska, especially Anchorage, of depends on the 18 state's oil well to meet extraordinarily high costs of 19 living.

20 Legislatures have called tribal 21 governments absolute evil to be feared. They have 22 publicly denigrated villages as freeloaders in the 23 name of a false equality, and that they trample upon constitutional protected tribal rights. In short, the 24 25 state has targeted rural Alaska with discriminatory

29 -- a forum, a hearing, or something, or several -- and 1 State Advisory Committee has expressed great 2 the interest in the Federation of Natives. So the query 3 what could we do? 4 is: T understand that it is -- if one is 5 going to Alaska for any reason to do something like 6 this, that it has to be done or should be done in 7 August, September, or October at the latest, that that 8 is -- and that the timing on this is -- they see it as 9 a matter of great urgency. 10 You know, as I do, that hearings -- the 11 way we do hearings and the way we prepare for them, 12 would take a year, or several months. It wouldn't 13 14 take a year, but several months, to organize. One option that they are recommending is 15 that we do the State Advisory Committee -- we support 16 the efforts of the State Advisory Committee to hold 17 some forums, and communities -- rural communities in 18 19 Africa -- in Alaska. And that -- yes, we could go to Africa, too. That would be good. .20 21 (Laughter.) 22 And that we might do what we did in the 23 case of Hawaii and in the case of South Dakota, where 24 some Commissioners might attend. That's one option. 25 Does anyone want to move something on this or speak to **NEAL R. GROSS** COURT REPORTERS AND TRANSCRIBERS 1323 RHODE ISLAND AVE., N.W. WASHINGTON, D.C. 20005-3701

| 3  | COMMISSIONER MEEKS: Well, probably, you                                                                                                            |
| 4  | know, a hearing might be a little too hard to organize                                                                                             |

31 Alaska and where people live. It is a big place. 1 I've been up there once. It was dark the whole time I 2 З was there. (Laughter.) 4 COMMISSIONER WILSON: That's the wrong 5 د ه 6 time of year to --7 (Laughter.) CHAIRPERSON BERRY: Yes. I don't know 8 9 what time of year that was. The weather was nice, but it was dark. 10 11 Anyway, I think that we talked about maybe going three or four places for forums, and maybe 12 13 if we could organize flights that could take us from 14 one place to the other. Apparently, the way people get around in Alaska is to fly, apparently. 15 That's 16 keeps talking what everybody about flying 17 everywhere. And --COMMISSIONER WILSON: 18 We could always 19 pretend we're in the Iditarod. 20 CHAIRPERSON BERRY: Yes, we could. 21 Right. 22 (Laughter.) 23 And get some dog sleds. 24 (Laughter.) 25 I don't know what time of year that is. **NEAL R. But, anyway, so the idea would be that if we could -if the SAC wanted to hold some forums, we would agree that either all of us or some of us would go. I would certainly commit myself.

But one of the points I made to them was 5 that the Commission doesn't have resources to do this. 6 7 We are stretched thin, as you know. And that anything we decide to do is contingent upon some 8 resources, in addition to what we do have, because we 9 just don't -- there's no -- I mean, we dropped 10 everything we can drop, and we do everything we can 11 do. And there may be some creative ideas about how we 12 can handle that problem. 13

But I think in general what we might do is agree that we are supportive of this and would like to do it. But I would think three or four places, since the population is so scattered and the Native Americans are -- the Native Alaskans are rural people, by and large, and we would go from one place to the other and try to organize flights.

Maybe on one day and an evening have a forum in one place, and then maybe go by plane from there to some other place, and the next day and evening have another one. And like take three or four days. It could even include a Saturday.

|----|----------------------------------------------------------------------------------------------------------------------------------------------------|
| 1  | We're going to run into schedule                                                                                                                   |
| 2  | problems, because those of us who teach know that when                                                                                             |
| 3  | fall comes we have classes. And so that's a problem.                                                                                               |
| 4  | And other people have other things on their schedules                                                                                              |
| 5  | that they have to do. I mean, everybody has a lot to                                                                                               |
| 6  | do.                                                                                                                                                |
| 7  | So we'd have to work up the schedule.                                                                                                              |
| 8  | But that's the idea maybe three or four places.                                                                                                    |
| 9  | Yes, Commissioner Wilson?                                                                                                                          |
| 10 | COMMISSIONER WILSON: Thank you, Madam                                                                                                              |
| 11 | Chair. I'm glad you brought up the issue of our                                                                                                    |
| 12 | financial resources, because, I mean, I think in                                                                                                   |
| 13 | fact, I think it's a shame that we don't have the                                                                                                  |
| 14 | resources to pull together a hearing, because I think                                                                                              |
| 15 | a hearing would have much more impact.                                                                                                             |
| 16 | One large hearing would have more of an                                                                                                            |
| 17 | impact than I mean, you know, it would you know,                                                                                                   |
| 18 | if that's what we can do, and meaning that we if we                                                                                                |
| 19 | have to fly from place to place, that's good. I think                                                                                              |
| 20 | we should definitely go. But I think it's a shame                                                                                                  |
| 21 | that we don't have the money to be able to pull                                                                                                    |
| 22 | together in a quick way a hearing.                                                                                                                 |
| 23 | CHAIRPERSON BERRY: Yes, Commissioner                                                                                                               |
| 24 | Thernstrom?                                                                                                                                        |
| 25 | COMMISSIONER THERNSTROM: Well, I would                                                                                                             |

| 1  | just I'd kind of like to take the time to have some                                                                  |
| 2  | kind of for the staff to provide some kind of brief                                                                  |
| 3  | for there to be a series of, you know, facts before                                                                  |
| 4  | us, so we can stare at the information, decide exactly                                                               |
| 5  | how to handle this.                                                                                                  |
| 6  | This, for me, is just too once over                                                                                  |
| 7  | lightly and fast in terms of the decisionmaking                                                                      |
| 8  | process. And I just wonder whether we can't have a                                                                   |
| 9  | briefing by the staff on this issue and come back to                                                                 |
| 10 | it next time with a more considered judgment.                                                                        |
| 11 | I mean, I, frankly, you know, just                                                                                   |
| 12 | listening it's just not sufficient for me. I'd                                                                       |
| 13 | like to hear, you know, the complexities of the issue,                                                               |
| 14 | both sides when it's a public policy matter, etcetera,                                                               |
| 15 | etcetera. Then I, you know, can think about it with                                                                  |
| 16 | some integrity.                                                                                                      |
| 17 | CHAIRPERSON BERRY: That would be very                                                                                |
| 18 | a way to do it procedurally if that was the way it                                                                   |
| 19 | could be done. The State Advisory Committees have the                                                                |
| 20 | power to decide to have forums on their own. We don't                                                                |
| 21 | decide whether they have forums or not. That's up to                                                                 |
| 22 | them.                                                                                                                |
| 23 | COMMISSIONER THERNSTROM: Right. But                                                                                  |
| 24 | it's                                                                                                                 |
| 25 | CHAIRPERSON BERRY: All we would be                                                                                   |

35 deciding is whether we were willing to go. And if 1 2 we're not willing to go, we don't have to. And when we've had them before, some Commissioners don't go. 3 It's entirely up to the Others decide to go. 4 Commissioners to decide. 5 COMMISSIONER THERNSTROM: But is it not 6 7 the case, Madam Chair, that when we go there is a -it becomes, in part, our report, and, you know, an 8 activity of this Commission as well as the -- as the 9 10 SAC. And, therefore, it does seem to me that before this Commission takes -- makes that decision, it would 11 be nice to be better informed than I feel at the 12 13 moment. CHAIRPERSON BERRY: Well, the purpose of 14 15 forums is to educate people. That's the whole And the purpose of SAC reports -- they're 16 purpose. their reports; they're not our reports. And the 17 18 purpose is to educate us. 19 If the SAC feels that they are informed 20 enough to have a forum, to have people come in from 21 all sides of the issues, which is what they do, to 22 talk about it, it wouldn't just be a forum. We talked 23 about this with Senator Stevens. It's not just a 24 forum where only Alaska Natives come to talk about 25 their problems. NEAL R. GROSS

| 15 | since they don't get paid anything. Whether they can                                                                                              |
| 16 | write a report or not depends on, you know, the                                                                                                   |
| 17 | resources. But they can at least shine a spotlight on                                                                                             |
| 18 | this issue.                                                                                                                                       |
| 19 | And all we're being asked to do is not                                                                                                            |
| 20 | you noticed when I read the statement I didn't say                                                                                                |
| 21 | that these were conclusions I had reached. I said                                                                                                 |
| 22 | that these were things that the Alaska Natives had                                                                                                |
| 23 | alleged were problems that they had.                                                                                                              |
| 24 | If the SAC believes that they want to                                                                                                             |
| 25 | have a forum, they can vote to have one anyway. But                                                                                               |

the process of deciding to have a forum does not 1 2 include the Commissioners -- we don't decide it. Ι guess that's the first thing. We decide what we do, 3 but they are our eyes and ears. They have autonomy. 4 They decide what they want to do. We don't decide for 5\_ 6 them. 7 Commissioner Redenbaugh? COMMISSIONER REDENBAUGH: Yes. I'm 8 I wasn't intending to interrupt. 9 sorry. 10 Τ think that the whole area is one definitely worth study and investigation. Would it 11 make sense to consider a briefing that we've had on 12 13many subjects, or is the nature of this so local that 14 a briefing wouldn't add much to our knowledge? What's your sense of that? 15 16 CHAIRPERSON BERRY: My sense of it is 17 that the best way to start it -- and it would just be 18 a start -- would be to have the forums, have people 19 from all sides in Alaska, have us see what the place 20 looks like, and get down on the ground, and who the 21 people are, and get some feel for it, and have the SAC 22 come back with whatever they come back with. 23 And then, my guess would be that out of 24 that we would see some areas where a hearing would 25 make sense -- a real formal process where there's NEAL R. | 1  | inquiry, there are witnesses, there are facts, you                                |
| 2  | know, that are in you know, that are being                                        |
| 3  | considered. That will take longer to do.                                          |
| 4  | It will probably be next year or                                                  |
| 5  | something before it could be done, but in the                                     |
| 6  | meanwhile the desire of local people to try to help                               |
| 7  | solve their problem, which they have a lot of tension,                            |
| 8  | they have a lot of problems, and they think that this                             |
| 9  | is one way to get an airing of these and have people                              |
| 10 | come together to talk about them around their state.                              |
| 11 | But I think, well, that's you know,                                               |
| 12 | that's a positive thing that can be contributed, so                               |
| 13 | long as there is access from everybody who wants to                               |
| 14 | come.                                                                             |
| 15 | COMMISSIONER REDENBAUGH: Right.                                                   |
| 16 | CHAIRPERSON BERRY: So long as we're                                               |
| 17 | there to look and to listen and that it's the SAC's                               |
| 18 | operation. But we're just showing our interest in it                              |
| 19 | by coming there.                                                                  |
| 20 | COMMISSIONER REDENBAUGH: I'm very                                                 |
| 21 | interested in it, and, in fact, would be inclined to                              |
| 22 | go there if we were to do that. What I don't have is                              |
| 23 | any sense of what this would cost and what we would                               |
| 24 | displace if we were to do this. I gather this would                               |
| 25 | cost substantially more than going to South Dakota,                               |

| ı  | but I don't have any sense that these are a number.                                                                                                |

| 11 | COMMISSIONER REDENBAUGH: Yes, I heard.                                                                                                             |
| 12 | CHAIRPERSON BERRY: So my inclination is                                                                                                            |
| 13 | not to try to we've displaced enough. And we've                                                                                                    |
| 14 | got so many things to do, and so little money. So I                                                                                                |
| 15 | made it very clear to everyone that my I'm                                                                                                         |
| 16 | supportive, and I think we should, you know, do                                                                                                    |
| 17 | something, and we should support the SACs if they want                                                                                             |
| 15 | to do something. But that we do need additional                                                                                                    |
| 19 | resources to pull it off. It will be expensive.                                                                                                    |
| 20 | COMMISSIONER REDENBAUGH: That's my                                                                                                                 |
| 21 | sense, just from what you've said.                                                                                                                 |
| 22 | CHAIRPERSON BERRY: Absolutely.                                                                                                                     |
| 23 | COMMISSIONER REDENBAUGH: Yes.                                                                                                                      |
| 24 | CHAIRPERSON BERRY: Commissioner Lee?                                                                                                               |

|    | 40                                                               |
|----|------------------------------------------------------------------|
| 1  | Chair. I think it's a fact that we really have not               |
| 2  | enough resources to do everything we want, but                   |
| 3  | particularly for the SACs. Many of them have                     |
| 4  | complained year after year since I've been here they             |
| 5  | just do not have even enough money to hold a yearly              |
| 6  | hearing a yearly meeting.                                        |
| 7  | And it's worse for Alaska and Hawaii,                            |
| 8  | because they're not so close technically here, and               |
| 9  | they tend to be neglected. And when you read the                 |
| 10 | state when I read the Staff Director's report,                   |
| 11 | there's hardly anything from Alaska and Hawaii. So I             |
| 12 | think that through the years, because of the resource            |
| 13 | allocation, I don't think they have been getting that            |
| 14 | kind of attention to their issues.                               |
| 15 | So I would strongly support any efforts                          |
| 16 | by the SACs if they want to do something, and I think            |
| 17 | it's due time that they should get some resources. I             |
| 18 | don't think we're going to drop anything because SAC             |
| 19 | should do the reports. They should hold forums when              |
| 20 | they're needed, and I think that it's a really                   |
| 21 | critical time for Alaska.                                        |
| 22 | All these issues that they've brought up,                        |
| 23 | they've been around for a long time, but now it's at             |
| 24 | the very critical stage. So I really hope that we'll             |
| 25 | be able to go hopefully before the end of September              |

| 1  | that's the new fiscal year because we don't know                                                                                                   |
| 2  | what's going to happen in the new year.                                                                                                            |
| 3  | CHAIRPERSON BERRY: Yes, Commissioner                                                                                                               |
| 4  | Wilson?                                                                                                                                            |
| 5  | COMMISSIONER WILSON: Thank you, Madam                                                                                                              |
| 6  | Chair. It seems as if there is some urgency, and also                                                                                              |
| 7  | there is the other element of the weather. And so you                                                                                              |
| 8  | had mentioned August/September. That doesn't give us                                                                                               |
| 9  | a lot of time.                                                                                                                                     |
| 10 | So my question is: are these SAC                                                                                                                   |
| 11 | meetings taking place definitely?                                                                                                                  |
| 12 | CHAIRPERSON BERRY: Well, the SACs want                                                                                                             |
| 13 | to do them, and they as I said, they could do them                                                                                                 |
| 14 | by the seat of their pants with nothing and just go                                                                                                |
| 15 | meet somewhere, because, you know, nobody you know,                                                                                                |
| 16 | if that's what they want to do. But they will need                                                                                                 |
| 17 | some additional the regional office will need some                                                                                                 |
| 18 | additional resources to support them.                                                                                                              |
| 19 | And if we decide if they'll have to                                                                                                                |
| 20 | travel, you know, all these places. And the regional                                                                                               |
| 21 | office will have to staff them. And if we decided to                                                                                               |
| 22 | go it would cost something. It could be and then                                                                                                   |
| 23 | the reports, which weren't planned for.                                                                                                            |
| 24 | So what I think we ought to do is we                                                                                                               |
| 25 | ought to if Elsie would modify her unseconded                                                                                                      |

| 12 | CHAIRPERSON BERRY: Part B?                                                                                                                        |
| 13 | COMMISSIONER WILSON: Yes. Part B is                                                                                                               |
| 14 | that since our going is and our proceeding fully is                                                                                               |
| 15 | contingent upon resources, my suggestion is that we                                                                                               |
| 16 | have we have a plan A, as if we did have the money,                                                                                               |
| 17 | and that we go ahead and plan this to figure out what                                                                                             |
| 16 | would be the right time, rather than having them go                                                                                               |
| 19 | ahead and plan it and then people                                                                                                                 |
| 20 | CHAIRPERSON BERRY: In other words, we                                                                                                             |
| 21 | could say when we might be able to come.                                                                                                          |
| 22 | COMMISSIONER WILSON: Right.                                                                                                                       |
| 23 | CHAIRPERSON BERRY: So that they would                                                                                                             |
| 24 | know for planning purposes.                                                                                                                       |
| 25 | COMMISSIONER WILSON: Exactly. And then,                                                                                                           |

| 12    | CHAIRPERSON BERRY: The same way every                                                                                                              |
| 13    | other government agency does by appropriation.                                                                                                     |
| 14    | COMMISSIONER THERNSTROM: Well, but, so                                                                                                             |
| 15    | we are making plans here, dependent on the                                                                                                         |
| 16    | Congressional appropriation, that seems to me quite                                                                                                |
| 17    | unlikely between now and you're talking about                                                                                                      |
| 17    |                                                                                                                                                    |
|       | September?                                                                                                                                         |
| 19    | CHAIRPERSON BERRY: Could be a                                                                                                                      |
| 20    | supplemental or a reprogramming. I think the                                                                                                       |
| 21    | Appropriations Committee must know how I don't know                                                                                                |
| - 22  | how to do this.                                                                                                                                    |
| . 23  | COMMISSIONER THERNSTROM: Yes. But, I                                                                                                               |
| 24    | mean, in your estimate, what is the likelihood of such                                                                                             |
| 25    | an appropriation, a timely appropriation?                                                                                                          |

|----|----------------------------------------------------------------------------------------------------------------------------------------------------|
| 1  | CHAIRPERSON BERRY: Well, I think                                                                                                                   |
| 2  | probably 60/40 or 50/50. It could happen. I think                                                                                                  |
| 3  | the I mean, Senator Stevens must know how to get an                                                                                                |
| 4  | appropriation if he really thinks it's something                                                                                                   |
| 5  | important. And it's only a small amount of money                                                                                                   |
| 6  | compared to what, you know, people do.                                                                                                             |
| 7  | So I would say all we can do is say that                                                                                                           |
| 8  | we're willing to do it. We think it's important,                                                                                                   |
| 9  | because I do think it's important. I wouldn't say we                                                                                               |
| 10 | would do it contingent even upon resources if I didn't                                                                                             |
| 11 | think it was important. So I know it's important. It                                                                                               |
| 12 | came to us. The SACs want to do it. And I think we                                                                                                 |
| 13 | should say we can do it. But we're just being                                                                                                      |
| 14 | realistic when we say if we don't have the resources,                                                                                              |
| 15 | we can't do it.                                                                                                                                    |
| 16 | COMMISSIONER THERNSTROM: Right. And                                                                                                                |
| 17 | would plan A, as Commissioner Wilson outlines it,                                                                                                  |
| 18 | would it take staff time and resources here, just in                                                                                               |
| 19 | the planning stage on the chance that we would                                                                                                     |
| 20 | CHAIRPERSON BERRY: No. No.                                                                                                                         |
| 21 | COMMISSIONER THERNSTROM: get a                                                                                                                     |
| 22 | Congressional appropriation?                                                                                                                       |
| 23 | CHAIRPERSON BERRY: No. All she was                                                                                                                 |
| 24 | saying is that we figure out when we could go, if we                                                                                               |

| 7  | COMMISSIONER WILSON: I do think that if                                                                                                            |
| 8  | we go ahead with this as planned, it's really not                                                                                                  |
| 9  | costing anybody anything. In fact, we've actually                                                                                                  |
| 10 | been spending 10 minutes discussing whether we should                                                                                              |
| 11 | make the plan.                                                                                                                                     |
| 12 | (Laughter.)                                                                                                                                        |
| 13 | A theoretical plan. And I think we                                                                                                                 |
| 14 | should just make the plan, so that because a lot of                                                                                                |
| 15 | it seems to me many of the Commissioners are                                                                                                       |
| 16 | interested in going, and it would be a shame if we                                                                                                 |
| 17 | couldn't go because of scheduling.                                                                                                                 |
| 18 | CHAIRPERSON BERRY: So she's really                                                                                                                 |
| 19 | talking about scheduling, and I don't know how much it                                                                                             |
| 20 | costs to look at one's calendar.                                                                                                                   |

| 17 | very effective. Each of them, interestingly, has been                                                                                               |
| 18 | in somewhat of an outlying area Santa Rosa,                                                                                                         |
| 19 | Northern California, South Dakota, and Hawaii folk                                                                                                  |
| 20 | who often feel that it's hard for them to get the ear                                                                                               |
| 21 | of government and other folk.                                                                                                                       |
| 22 | And so when we have been able to respond                                                                                                            |
| 23 | to them they've been very satisfied that finally, you                                                                                               |
| 24 | know, they had an official group that could listen.                                                                                                 |
| 25 | And thereby the local officials pay more attention to                                                                                               |

the issues that are before them. So I just want to 1 make that observation based on my own experience. 2 Secondly, you know, if -- I agree that it З would be too bad to have this go forward and then 4 because of calendar none of us could attend. 5 I'd suggest that we might look at July and when we have 6 7 the already scheduled Commission meeting and try to do something around that date, if that makes sense. 8 9 COMMISSIONER WILSON: Do you mean to go in July? 10 11 VICE CHAIR REYNOSO: I beg your pardon? COMMISSIONER WILSON: Are you suggesting 12 13 that we would go in July? 14 VICE CHAIR REYNOSO: Hope so. 15 CHAIRPERSON BERRY: He likes Alaska. 16 COMMISSIONER WILSON: Well, I like New 17 York in June. of time to plan it.

And, in fact, what you'd learn at the 2 forums would help you to figure out what to have the 3 hearing about. So that would -- in a way, it would be 4 an idea way to go forward. And then there are the 5 reasons that Cruz gave about people who are in states 6 like Alaska and Hawaii, and so on. And, Yvonne, they 7 figured no one ever pays any attention to their 8 grievances, and it's important to pay attention to 9 10 them. Ι understand that in September and 11 October there is they are not hunting and 12 \_\_ 13 gathering. COMMISSIONER WILSON: So does that mean 14 it's better or worse? 15 CHAIRPERSON BERRY: That's why October is 16 17 That's why August -- July could work. not good. That's why August is good, too. But Cruz's suggestion 18 19 is that we do it around the Commission meeting. 20 That's interesting. I hadn't thought about doing it 21 that early. But that we tentatively put those down as 22 dates for the SAC people, to try to figure out --23 COMMISSIONER WILSON: Would they be able 24 to pull it together? 25 CHAIRPERSON BERRY: Let me try to answer, NEAL R. 50 Commissioner Wilson. Generally, my experience 1 has , been that when it's one of these forums, if they know 2 they can do it and they have the resources, 3 that they're going to have resources available to help. 4 They already know who the people are who they want to 5 come to the forums. It's not like they don't know. 6 7 So they can pull them together in rather short order out in the states. They probably, right 8 9 at this moment, know who they would like to have come. And so I don't think that would be a problem. Yes? 10 VICE CHAIR REYNOSO: Yes. Madam Chair, 11 my supposition is that getting more funds -- it really 12 depends on an individual Senator, and in this case it 13 might be Senator Stevens -- having a sufficient 14 interest, that the person would push it internally for 15 a supplemental appropriation or something of that 16 17 sort. And so if that or other legislators who 18 19 are interested in this know the -- tell me the date 20 that we're thinking about, why then they can try to see whether they have any luck in being able to get 21 22 those resources by that date. CHAIRPERSON BERRY: What I would like to 23 have us consider the dates that Cruz 24 do is to mentioned, 25 which would be like Thursday, Friday, NEAL R. | 19  | COMMISSIONER THERNSTROM: No, just as                                                                                              |
| 20  | CHAIRPERSON BERRY: All I'm saying is                                                                                              |
| 21  | and we haven't even asked. What I had said was that                                                                               |
| 22  | I met with Senator Stevens at his request, and                                                                                    |
| 23  | explained that we would discuss this, and we had                                                                                  |

| 25  | that they were recommending that they wanted to do                                                                                |

| 1  | this.                                                                                                                                              |
| 2  | And that but I just made it clear to                                                                                                               |
| 3  | him that I just didn't see how we could do it without                                                                                              |
| 4  | any additional resources. But I did not ask him to                                                                                                 |
| 5  | give us a supplemental, no. I didn't ask him to give                                                                                               |
| 6  | us anything. I just said that we couldn't do it                                                                                                    |
| 7  | without the additional resources, and he seemed to                                                                                                 |
| 8  | think that there was some way to do it.                                                                                                            |
| 9  | So all we can do is say that we are                                                                                                                |
| 10 | willing to do it. The Commissioners are willing to                                                                                                 |
| 11 | say that these are some dates when they might be                                                                                                   |
| 12 | willing to participate, and that we've had this                                                                                                    |
| 13 | discussion, and let it go at that for the time being.                                                                                              |
| 14 | That's about all we can do.                                                                                                                        |
| 15 | What about those dates still at the end?                                                                                                           |
| 16 | Anybody got a yes, Elsie?                                                                                                                          |
| 17 | COMMISSIONER MEEKS: It works for me.                                                                                                               |
| 19 | CHAIRPERSON BERRY: Those work, too?                                                                                                                |
| 19 | Okay.                                                                                                                                              |
| 20 | COMMISSIONER WILSON: Are you talking                                                                                                               |
| 21 | about the end of August here?                                                                                                                      |
| 22 | CHAIRPERSON BERRY: Yes. One alternative                                                                                                            |
| 23 | is the July thing that Cruz mentioned. The other one                                                                                               |
| 24 | is to try to if that doesn't work for some reason                                                                                                  |
| 25 | to try to do the one at the end of August.                                                                                                         |

| 7  | COMMISSIONER LEE: August works better                                                                                                              |
| 8  | for me.                                                                                                                                            |
| 9  | CHAIRPERSON BERRY: Okay.                                                                                                                           |
| 10 | COMMISSIONER LEE: July would be a rough                                                                                                            |
| 11 | time.                                                                                                                                              |
| 12 | CHAIRPERSON BERRY: Russell?                                                                                                                        |
| 13 | COMMISSIONER REDENBAUGH: I don't happen                                                                                                            |
| 14 | to have my August calendar, so I I can't speak to                                                                                                  |
| 15 | that right now.                                                                                                                                    |
| 16 | CHAIRPERSON BERRY: Okay. Do you know                                                                                                               |
| 17 | what your July calendar is like, the July meeting                                                                                                  |
| 18 | date?                                                                                                                                              |
| 19 | COMMISSIONER REDENBAUGH: Yes. What is                                                                                                              |
| 20 | the July meeting date?                                                                                                                             |
| 21 | VICE CHAIR REYNOSO: 13th.                                                                                                                          |
| 22 | CHAIRPERSON BERRY: The 13th.                                                                                                                       |
| 23 | COMMISSIONER REDENBAUGH: I think that                                                                                                              |
| 24 | does work. I mean, August may. I just don't know.                                                                                                  |
| 25 | CHAIRPERSON BERRY: I see. Okay. Yes?                                                                                                               |

| 1  | COMMISSIONER MEEKS: So if we went with                           |
| 2  | Cruz's recommendation, which really wouldn't be as               |
| 3  | good for me, but that would mean we'd have the SAC               |
| 4  | or the meeting there?                                            |
| 5  | CHAIRPERSON BERRY: Yes. Like we would                            |
| 6  | have the Commission if we did what he suggests, we               |
| 7  | would have our business meeting, whatever we were                |
| 8  | doing in terms of business, and a small meeting up               |
| 9  | there. But we'd have to make sure we had a quorum or             |
| 10 | that we didn't have any items to                                 |
| 11 | Which one was the one you couldn't come                          |
| 12 | to?                                                              |
| 13 | COMMISSIONER WILSON: August.                                     |
| 14 | CHAIRPERSON BERRY: The whole week?                               |
| 15 | COMMISSIONER WILSON: Yes, I'm going to                           |
| 16 | be away, very away.                                              |
| 17 | COMMISSIONER THERNSTROM: I have no my                            |
| 18 | calendar is incomplete. It's complete at home. It's              |
| 19 | incomplete here.                                                 |
| 20 | CHAIRPERSON BERRY: So you don't know                             |
| 21 | either.                                                          |
| 22 | COMMISSIONER THERNSTROM: I don't know.                           |
| 23 | CHAIRPERSON BERRY: Well, then, what we                           |
| 24 | will say is I could do either one of those dates,                |
| 25 | if I don't go to South Africa, so that'll help me                |

| 9  | Kristina let them know, say sometime next week,                                                                                   |
| 10 | whether those are possible dates for you?                                                                                         |
| 11 | COMMISSIONER THERNSTROM: That's fine.                                                                                             |
| 12 | COMMISSIONER REDENBAUGH: Will do.                                                                                                 |
| 13 | CHAIRPERSON BERRY: And can we the                                                                                                 |
| 14 | motion, Elsie, would you like to have the motion                                                                                  |
| 15 | restated or restate it as I restated it, or whatever?                                                                             |
| 16 | COMMISSIONER MEEKS: Well, I am willing                                                                                            |
| 17 | to restate that. However, provided we do not I                                                                                    |
| 18 | mean, if we would not get appropriations, I would want                                                                            |
| 19 | to revisit this.                                                                                                                  |
| 20 | CHAIRPERSON BERRY: Okay.                                                                                                          |
| 21 | COMMISSIONER MEEKS: And see what is                                                                                               |
| 22 | possible, because it's not an excuse not to shed light                                                                            |
| 23 | on this issue. They've not been able the SAC, I                                                                                   |
| 24 | think in the mid '90s, invited several federal                                                                                    |
| 25 | agencies, and I think out of nine only two showed up                                                                              |

| 1  | because they didn't have the budgets to go to Alaska.                                                                                              |
| 2  | And I think it's high time that there was light shown                                                                                              |
| 3  | in Alaska on these issues, so                                                                                                                      |
| 4  | CHAIRPERSON BERRY: So we would pass the                                                                                                            |

| 6  | get an appropriation, we would revisit in the next                                                                                                 |
| 7  | cycle somehow how we could do something in Alaska                                                                                                  |
| 8  | anyway, despite the fact that we didn't get any money                                                                                              |
| 9  | to do it. That's reasonable.                                                                                                                       |
| 10 | Okay. So the motion is whatever I said.                                                                                                            |
| 11 | Oh, that we would have, what, four three or four                                                                                                   |
| 12 | we would support the SAC in their desire to have                                                                                                   |
| 13 | three or four forums in Alaska, contingent upon                                                                                                    |
| 14 | resource availability, and that the Commissioners                                                                                                  |
| 15 | agree, in principle, that they would attend the forum.                                                                                             |
| 16 |                                                                                                                                                    |
| 17 | And Cruz and I agree absolutely that we                                                                                                            |
| 18 | would attend? Okay.                                                                                                                                |
| 19 | COMMISSIONER MEEKS: And I agree                                                                                                                    |
| 20 | absolutely.                                                                                                                                        |
| 21 | COMMISSIONER LEE: I do, too.                                                                                                                       |
| 22 | CHAIRPERSON BERRY: And Elsie and Yvonne                                                                                                            |
| 23 | agree absolutely that they would attend, and Vickie                                                                                                |
| 24 | and the rest depending on their schedules and when                                                                                                 |
| 25 | this thing will be set up. So that's the motion.                                                                                                   |

58 dealing with situations like this. 1 Since the plane collision incident, the 2 situation between U.S. and China relations has gotten 3 more tense. Besides the examples that you have cited 4 here, there has been stepped up efforts through the 5 internet, through radio talk shows, to really stir up 6 antagonism against Asian Americans. 7 And for the next few weeks and the next 8 few months I think tension is going to continue to 9 rise, because Congress is expected to hold a series of 10 hearings involving China, such as MFN and the plane 11 investigation, and what have you. 12 And also, recently, Committee of 100, 13 which is a New York-based organization whose members 14 include Yo Yo Ma, I. M. Pei, and other prominent 15 Chinese Americans, they commissioned a survey of over 16 a thousand Americans. And, you know, some of us don't 17 it was surprising, but some felt it was think 18 surprising, that over 60 percent of the respondents 19 hold either a somewhat or a very negative view of 20 .Chinese-Americans. 21 And since most cannot make a distinction 22 between Chinese Americans and Asian Americans, the 23 Asian American community think this is a really 24 25 spiraling wakeup call. Because of all these events, the Asian 1 American community continues to feel the heat, what 2 have you, as you have mentioned in your statement. 3 And I remember during the '96/'97 campaign finance 4 forum here, and community 5 controversy we held a 6 members and media observers came and testified, saying 7 because of the media and public officials' that comments, and the way they reported on the way to 8 9 campaign finance controversy was Asian Americans were 10 particularly targeted.

And, worse yet, because of this kind of 11 discriminatory reporting observation, 12 and when 13 Congress was holding hearings on the campaign finance 14 controversy several Congressional leaders were using 15 stereotypical derogatory or comments on Asian 16 Americans, which caused further antagonism toward the 17 entire community.

18 And given the fact that Congress is going to hold these hearings relating -- regarding China in 19 20 the near future, I wanted to bring up the possibility 21 of this Commission sending to both the leadership and 22 the ranking members of the committees who will be holding these hearings a copy of your statement, and 23 24 also a letter to them urging them to refrain from 25 certain rhetoric that would inflame antagonism toward

| 2  | And also, to urge them to be very careful                        |
| 3  | when they're debating on U.S. China relations. That              |
| 4  | it's not U.S. and Chinese-American or Asian American             |
| 5  | relations, that they have to make a really clear                 |
| .6 | distinction that they're dealing with Chinese, but               |
| 7  | they should not be mixing up Chinese-Americans and               |
| 8  | Asian Americans in the debate, because the American              |
| 9  | public already does not have a very clear view of who            |
| 10 | Asian Americans are. And we certainly need public                |
| 11 | officials to help make a clear distinction.                      |
| 12 | So I hope that we can issue a letter in                          |

| 18 | VICE CHAIR REYNOSO: Madam Chair, I think                         |
| 19 | it would be wise to send a letter ahead of the                   |
| 20 | hearings. I still recall so vividly the quite                    |
| 21 | dramatic testimony that we received from Asian                   |

CHAIRPERSON BERRY: They don't get the 4 5 news --VICE CHAIR REYNOSO: This was just last 6 7 week, I believe. CHAIRPERSON BERRY: But I thought that we 8 were supposed to distribute news clips every day to 9 10 the people who are here. COMMISSIONER WILSON: No. 11 We don't get them every day. We get --12 13 CHAIRPERSON BERRY: Well, just a minute. You are not a Commissioner Assistant. I'm asking 14 about the Commissioners Assistants. 15 (Laughter.) 16 COMMISSIONER WILSON: Well, 17 you know I don't have an assistant. 18 what? CHAIRPERSON BERRY: I know that, 19 but that's why I'm asking about the ones who do have 20 21 assistants. COMMISSIONER WILSON: So I would think if 22 23 I don't have one, it would come directly to little old 24 me. 25 CHAIRPERSON BERRY: Okay. But I thought NEAL R. | 22 | I think it would be very helpful to go back and review                                                                                             |
| 23 | that.                                                                                                                                              |
| 24 | COMMISSIONER WILSON: I would like to                                                                                                               |
| 25 | have that, too.                                                                                                                                    |

| 1  | VICE CHAIR REYNOSO: That's right,                                                                                                                  |
| 2  | because you weren't here at that time.                                                                                                             |
| 3  | COMMISSIONER THERNSTROM: Madam Chair?                                                                                                              |
| 4  | CHAIRPERSON BERRY: Yes.                                                                                                                            |
| 5  | COMMISSIONER THERNSTROM: My assistant                                                                                                              |
| 6  | just said she reviews the clippings every day, that it                                                                                             |
| 7  | was not included in the clippings, and that' she just                                                                                              |
| 8. | got it he pulled it Commissioner Meeks'                                                                                                            |
| 9  | assistant pulled it off the internet. But evidently                                                                                                |
| 10 | it was not in our package of clippings, according to                                                                                               |
| 11 | Kristina Arriaga.                                                                                                                                  |
| 12 | CHAIRPERSON BERRY: Yes. Well, the point                                                                                                            |
| 13 | I was making by asking the question is that my                                                                                                     |
| 14 | understanding was, and we revisited this question a                                                                                                |
| 15 | million times, there ought to be news clips there                                                                                                  |
| 16 | are supposed to be. And I have said and thought, when                                                                                              |
| 17 | we discussed this before, that people would be given                                                                                               |
| 19 | them every day, depending on what, you know, happened                                                                                              |
| 19 | in the press that day.                                                                                                                             |
| 20 | So I was just assuming that. So I                                                                                                                  |
| 21 | discover, again, that I was wrong. I remember when                                                                                                 |
| 22 | Leon was here Higginbotham he went into a great                                                                                                    |
| 23 | tirade about the fact that we couldn't get news clips,                                                                                             |
| 24 | and he thought that since the Commission gave us so                                                                                                |
| 25 | little else, that at least we ought to be able to                                                                                                  |

| 1  | figure out, you know, the news clips. And somebody                                                                                                 |
| 2  | said, "Why don't you look it up on the internet?"                                                                                                  |
| 3  | (Laughter.)                                                                                                                                        |
| 4  | So, Staff Director, having said that,                                                                                                              |
| 5  | let's see if we can do a job of getting the news clips                                                                                             |
| 6  | every morning to the Commissioners or their                                                                                                        |
| 7  | assistants, if they have any.                                                                                                                      |
| 8  | STAFF DIRECTOR JIN: Okay.                                                                                                                          |
| 9  | CHAIRPERSON BERRY: All right. I've                                                                                                                 |
| 10 | forgotten where we were in the discussion.                                                                                                         |
| 11 | VICE CHAIR REYNOSO: Madam Chair, I would                                                                                                           |
| 12 | just suggest that the briefing that the transcript                                                                                                 |
| 13 | of the briefing that we had on this issue, which I                                                                                                 |
| 14 | thought was a very important briefing, be made                                                                                                     |
| 15 | available, particularly to the Commissioners who                                                                                                   |
| 16 | weren't here at that time, because it was really quite                                                                                             |
|    | dramatic, I thought.                                                                                                                               |
| 15 | CHAIRPERSON BERRY: Yes. I think that                                                                                                               |
| 19 | that should be we should make sure that                                                                                                            |
| 20 | Commissioners have a copy of that, so they can read                                                                                                |
| 21 | it, because, as Commissioner Lee was pointing out, a                                                                                               |
| 22 | number of the things that were said by different                                                                                                   |
| 23 | people came up in the briefing. And there was not any                                                                                              |
| 24 | no one controverted that people had actually said                                                                                                  |
| 25 | these things.                                                                                                                                      |

| 1  | It was a question of apologizing for                                                                                                               |
| 2  | them, feeling sorry about it, not really meaning,                                                                                                  |
| 3  | whatever. So we should get those copies out to people                                                                                              |
| 4  | who don't have                                                                                                                                     |
| 5  | STAFF DIRECTOR JIN: It's not very thick,                                                                                                           |
| 6  | so let me let us get it to all of you, just in                                                                                                     |

| 8  | may not be able to put your hands on it too quickly.                                                                                               |
| 9  | Just a question was Commissioner                                                                                                                   |
| 10 | Thernstrom's request for the that we try to get the                                                                                                |
| 11 | survey itself, or was it just the report?                                                                                                          |
| 12 | COMMISSIONER THERNSTROM: Well, it                                                                                                                  |
| 13 | depends on yes, I wouldn't mind seeing the survey.                                                                                                 |
| 14 | CHAIRPERSON BERRY: If they will give it                                                                                                            |

| 18 | COMMISSIONER THERNSTROM: Yes, I like to                                                                                                            |
| 19 | look at data as it is collected, as it                                                                                                             |
| 20 | CHAIRPERSON BERRY: Yes. So if they'll                                                                                                              |
| 21 | give it to us                                                                                                                                      |
| 22 | STAFF DIRECTOR JIN: Okay. We'll try.                                                                                                               |
| 23 | CHAIRPERSON BERRY: and it's not                                                                                                                    |
| 24 | proprietary, then we can                                                                                                                           |
| 25 | STAFF DIRECTOR JIN: We can try.                                                                                                                    |

| 11 | Americans, overwhelmingly, 23 percent of Americans are                                                                                             |
| 12 | uncomfortable voting for an Asian American candidate                                                                                               |
| 13 | for President. Many of them disapprove of someone in                                                                                               |
| 14 | the family marrying a Chinese-American. But at the                                                                                                 |
| 15 | same time, they value the Asian American work ethic,                                                                                               |
| 16 | you know, education, family values, and everything.                                                                                                |
| 17 | So I think that's why the Asian American                                                                                                           |
| 18 | community has felt that the American public really                                                                                                 |
| 19 | does not have a complete view of who they are. You                                                                                                 |
| 20 | know, they are not the model minority, but at the same                                                                                             |
| 21 | time they are not foreigners either.                                                                                                               |
| 22 | So I think this survey really shed the                                                                                                             |
| 23 | light that the community has been saying, and that's                                                                                               |
| 24 | why the upcoming hearings are going to be so critical.                                                                                             |
| 25 | Whatever is being said on in Congress will                                                                                                         |

So if people continue to . 1 insensitive remarks, it's really 2 make qoinq to perpetuate the --3 COMMISSIONER THERNSTROM: But the 4 I'm delighted Yankolovich does very, very good work. 5 My point was only that it didn't to look at this. 6 square with other polling data that I have seen. And, 7 you know, if we talk about things like intermarriage 8 9 rates, because they're very, very high, and suggesting -- and, after all, intermarriage is the test of --10 intermarriage rates are the test of tolerance towards 11 12 groups. And so, you know, I simply was interested 13 in the actual data. |----|------------------------------------------------------------------|
| 1  | I'm indulging myself.                                            |
| 2  | It seems to me that, arguably, the                               |
| з  | willingness of one individual to marry another across            |
| 4  | racial or ethnic lines may occur with or without any             |
| 5  | evidence that overall attitudes toward a particular              |
| 6  | group have been modified or changed, either before or            |
| 7  | after that action.                                               |
| 8  | So I'm just asking for intellectual                              |
| 9  | insight.                                                         |
| 10 | COMMISSIONER THERNSTROM: Well, look I                            |
| 11 | mean, if we look at one of the signs of the                      |
| 12 | persistence of the American dilemma, as it were, is              |
| 13 | that black-white intermarriage rates are still very              |
| 14 | low about 12 percent of all new black marriages.                 |
| 15 | And, obviously, historically relations                           |
| 16 | between races, sexual relations, dating, it and                  |
| 17 | eventually marriage has been the most enormous you               |
| 18 | know, it's been symbolic of you know, it's what the              |
| 19 | white south feared. God, what's going to happen to               |
| 20 | our precious white women, etcetera, with                         |
| 21 | desegregation?                                                   |
| 22 | And so that I regard it as a very telling                        |
| 23 | figure. Intermarriage rates is a very telling figure,            |
| 24 | and, indeed, as I said, the most telling figure, when            |
| 25 | the degree of acceptance of members of a group has               |

1 the extent that a group is seen to be more like those who traditionally are in a majority or have power in 2 our society -- in the society, any society, that it З might be more likely that an individual who decides to 4 like an individual marriage 5 marry one of them, 6 decision, might take and place in a context a feeling 7 that there will be more acceptance.

8 You know, when John and Jo Suzi decide to 9 marry each other, or Wen Ho Lee and Suzi Chen decide 10 to marry each other, or Wen Ho Lee and Suzi O'Connor 11 decide to marry each other, they may think that if 12 Asian Americans are regarded as more like whites in 13 neighborhood integration, all terms of sorts of 14 things, that their individual choice to marry each 15 other might be more acceptable and create fewer 16 problems for them than if these other indicators 17 didn't show that.

18 So all I'm saying is that intermarriage 19 rates may indeed show that there is more tolerance. 20 I'm not disputing that it's possible. But they don't 21 necessarily -- it could be the other way around, that 22 individual marriage rates are dependent upon what 23 happens elsewhere on the other indicators, which show 24 -- I mean, I realize that this is a nice point. But I 25 just --

75 how -- I mean, as a social scientist, I don't know how 1 2 you figured that -- how one comes to that conclusion. I mean, there simply are not the data upon which you 3 can base such an "if" proposition. If, you know, Jews 4 hadn't experienced the discrimination they did, their 5 incomes would have been even -- I mean, I just -- I 6 7 can't go down that road, because it's not one that it seems to me you can support in a rigorous manner. 8 I can easily project 9 CHAIRPERSON BERRY: how much money somebody would make given their levels 10 11 of education, their backgrounds, and all the rest. We can project, based on human 12 And you can, too. 13 capital and conditions, how much particular individuals, given the markets, are likely to make. 14 15 And if they don't make that -- I'm talking about an 16 individual, not a group of people -- we can start looking to try to figure out what's wrong. 17 18 COMMISSIONER THERNSTROM: Well. we're 19 talking about group averages here and group 20 portraits of groups. But I don't think we should 21 continue this seminar. Russell, do you have 22 CHAIRPERSON BERRY: 23 any light to shed on this? 24 COMMISSIONER **REDENBAUGH:** Well. Ι 25 wouldn't say that it's light. automatically that Asian Americans are being accepted . in the mainstream, because we have such a high rate of intermarriage.

So intermarriage within the Asian 4 American community has different factors. But one 5 should not conclude that just because we have one of 6 the highest rates of intermarriage that means that we 7 are being more accepted by the mainstream community. 8 Secondly, one more thing about the 9

economic situation that the Chair had mentioned, back 10 in '94 a report was issued that shows very clearly 11 professionals, despite their American 12 Asian educational level, experience, qualifications, are 13 being paid much less than their white counterparts 14 with similar backgrounds. 15

So, you know, those are the things that maybe we cannot look at that maybe the social scientists can take a look at.

COMMISSIONER THERNSTROM: Well, I don't 19 continue this, obviously, but Ι did 20 want to specifically on the intermarriage refer to third 21 generation, so that Asian Americans, you know --22 Well --CHAIRPERSON BERRY: Okay. 23

2 "The leaders of the Florida House and 3 Senate have agreed upon a legislative package that 4 will be presented for a vote today. The Commission 5 hopes it will pass and that Governor Jeb Bush will 6 sign the legislation.

"The Commission's preliminary assessment 7 found serious flaws in the voting mechanisms used in 8 9 Florida and is pleased with the proposed elimination 10 of punch cards, paper ballots, mechanical lever and central voting -- central counting 11 machines, 12 voting systems.

13 "Once implemented, the provisional ballot would also decrease 14 some of the problems that 15 disproportionately impact communities poor and communities of color 16 that were revealed at the 17 Commission's hearings. Funding, which should be 18 provided for education and poll worker training, could 19 reduce the problems that were experienced by Florida 20 voters.

"The 21 legislation also addresses, among 22 other things, absentee ballots, recounts, certification deadlines, and military and overseas 23 24 voting -- all of which were problematic in the 25 November 2000 election.

| 1  | VICE CHAIR REYNOSO: Right.                                                                                                                         |
| 2  | COMMISSIONER REDENBAUGH: since the                                                                                                                 |
| 3  | legislation hasn't passed, I would just make the                                                                                                   |
| 4  | editorial change to say "if," make it a conditional,                                                                                               |
| 5  | rather than "once."                                                                                                                                |
| 6  | And then, I would feel more comfortable                                                                                                            |
| 7  | with a word other than "monitor." You know, "examine"                                                                                              |
| 8  | or, you know, something more neutral than                                                                                                          |
| 9  | VICE CHAIR REYNOSO: In terms of the                                                                                                                |
| 10 | hearing, where we say here that we'll be having                                                                                                    |
| 11 | hearings. It now reads, "Once the legislation has                                                                                                  |
| 12 | passed and implementation has begun, the Commission                                                                                                |
| 13 | will monitor the impact" as opposed to "assess the                                                                                                 |
| 14 | impact"?                                                                                                                                           |
| 15 | COMMISSIONER REDENBAUGH: Yes. I would                                                                                                              |
| 16 | prefer something like "assess."                                                                                                                    |
| 17 | VICE CHAIR REYNOSO: "Assess the impact."                                                                                                           |
| 18 | COMMISSIONER REDENBAUGH: I think that's                                                                                                            |
| 19 | a much better word.                                                                                                                                |
| 20 | VICE CHAIR REYNOSO: So that the third                                                                                                              |
| 21 | paragraph, the one where, "If passed," it now reads,                                                                                               |
| 22 | "Once implemented, the provisional ballot could also                                                                                               |
| 23 | decrease some of the problems that disproportionately                                                                                              |
| 24 | impacted the poor community," etcetera. So it would                                                                                                |
| 25 | now read, "If passed, the provisional ballot" "If                                                                                                  |

| 2  | COMMISSIONER REDENBAUGH: Right.                                                                                                                    |
| з  | VICE CHAIR REYNOSO: Okay.                                                                                                                          |

| 6  | VICE CHAIR REYNOSO: Right.                                                                                                                         |
| 7  | COMMISSIONER REDENBAUGH: But                                                                                                                       |
| 8  | VICE CHAIR REYNOSO: Right. And then                                                                                                                |
| 9  | change "monitor" to "assess." I think those are good                                                                                               |

| 11 | COMMISSIONER REDENBAUGH: Thank you. I                                                                                                              |
| 12 | have one more, and that is in a subsequent paragraph                                                                                               |
| 13 | we say "voting irregularities."                                                                                                                    |
| 14 | VICE CHAIR REYNOSO: Well, actually, I                                                                                                              |
| 15 | think it's the same paragraph. After it we say, "Once                                                                                              |

| 22 | COMMISSIONER REDENBAUGH: Yes. Isn't                                                                                                                |
| 23 | "irregularities" a term of art here?                                                                                                               |
| 24 | VICE CHAIR REYNOSO: I don't think so. I                                                                                                            |
| 25 | think that's just a broad category to say something                                                                                                |

| 1  | went awry. At least that's the way I take it.                    |
| 2  | COMMISSIONER REDENBAUGH: Yes. Well, I                            |
| 3  | would prefer something like "difficulties" or                    |
| 4  | "problems." Certainly                                            |
| 5  | VICE CHAIR REYNOSO: Yes, okay.                                   |
| 6  | COMMISSIONER REDENBAUGH: much of what                            |
| 7  | we heard had to do with just the system being                    |
| 8  | overwhelmed by the volume of voter turnout.                      |
| 9  | VICE CHAIR REYNOSO: "Well-publicized                             |

| 12 | CHAIRPERSON BERRY: So that would mean in                         |
| 13 | the last paragraph you would                                     |

| 15 | CHAIRPERSON BERRY: change                                        |
| 16 | "irregularities" to "problems."                                  |
| 17 | VICE CHAIR REYNOSO: Yes. We repeat that                          |
| 18 | "irregularities" and "problems" would fit very                   |
| 19 | nicely there. Yes.                                               |
| 20 | COMMISSIONER REDENBAUGH: Good change.                            |
| 21 | I'd make the change globally.                                    |
| 22 | VICE CHAIR REYNOSO: Yes. Okay.                                   |
| 23 | CHAIRPERSON BERRY: Go right ahead,                               |

COMMISSIONER THERNSTROM: Well, I'm not 4 1 2 entirely happy with this statement. I think that the paragraph -- actually, it's two paragraphs here, that 3 the Commission's preliminary assessment found serious 4 the voting mechanisms used in Florida, 5 flaws in 6 etcetera.

I mean, this is conclusionary. 7 We have not yet issued a report, and I do not -- I continue to 8 9 think that our preliminary assessment was too preliminary, that we should be holding our fire until 10 we have properly gone through all the subpoenaed and 11 other material, until the affected public officials 12 have had a chance to respond, and that we say -- it 13 says here -- there is reference to problems that 14 communities, 15 disproportionately impacted poor communities of color. 16

17 But we did hear conflicting testimony that, in fact, for instance, punch card ballots were 18 19 used in more affluent rather than less affluent 20 I would like to delete any -- to make communities. 21 this much simpler and to delete the two paragraphs starting with the Commission's preliminary assessment, 22 just simply a commendation of what has been approved 23 or is likely to be approved in Florida immediately. 24 25 Well, Ι VICE CHAIR **REYNOSO:** no,

appreciate your observations, Commissioner Thernstrom. 1 But it is a fact -- I know that you've brought these 2 issues before, but it's a fact that that was the 3 Commission's preliminary assessment by a substantial 4 vote in the Commission. 5 So one might still disagree with that, 6 7 it was officially on a vote the preliminary but assessment of this Commission. 8 COMMISSIONER THERNSTROM: Well, I still 9 -- I still believe that a very simple statement simply 10 saying, "We are very pleased at what has happened in 11 Florida" will be more effective and, you know, raises 12 13 none of the problems which I have -- which, if I am 14 spotting, others will, too. 15 VICE CHAIR REYNOSO: Well, I'm not guite 16 sure how to respond, because this really was the assessment, though one may disagree with that, then. 17 18 So it seems to me not inappropriate to include that 19 summary. 20 CHAIRPERSON BERRY: Are you on another Could I, then, speak, Vice Chair? 21 point? 22 VICE CHAIR REYNOSO: Yes. 23 CHAIRPERSON BERRY: Let me speak to this 24 point. The Commission has learned over the years to 25 be very cautious, and I often have to be reminded by NEAL R. GROSS COURT REPORTERS AND TRANSCRIBERS 1323 RHODE ISLAND AVE., N.W. 91 And so I think it would minimize the role 1 that we played, and I think this Commission was very 2 courageous in playing, and with great sacrifice on the 3 part of many of the members going down there and doing 4 all that, and the courage and the timing on everything 5 else we've done, not to mention the preliminary 6 7 assessment. So I think that praise is in order, but I 8 9 think we also need the rest of this, Mr. Vice Chair. VICE CHAIR REYNOSO: Yes, Commissioner 10 Wilson? 11 Thank you, Mr. Vice 12 COMMISSIONER WILSON: 13 Chair. 14 Going back to the use of the word 15 "irregularities," I have to say I have a problem 16 removing that word altogether from the statement. Ι 17 can understand the first -- taking it out in the first 18 mention, where it says, "The Commission launched its 19 investigation within days of receiving reports of 20 voting irregularities." 21 You have replaced it with "problems." Is 22 that --23 COMMISSIONER REDENBAUGH: Well, in that 24 case, actually, where it says "reports of" --25 COMMISSIONER WILSON: Well, wait а NEAL R. | 10 | CHAIRPERSON BERRY: I thank you very                                                                                                                |
| 11 | much, Commissioners. And if the staff would make the                                                                                               |
| 12 | editing changes to reflect the discussion, and then                                                                                                |
| 13 | issue that, we would very much appreciate it.                                                                                                      |
| 14 | VIII. Discussion of Sandoval Case                                                                                                                  |
| 15 | CHAIRPERSON BERRY: Then, the next item                                                                                                             |
| 16 | on the agenda is the State Advisory Committee Reports.                                                                                             |
| 17 | We've got oh, no. It's not the State Advisory                                                                                                      |
| 18 | it's the Sandoval case. And we're going to ask the                                                                                                 |
| 19 | General Counsel to come forward to brief us on this.                                                                                               |
| 20 | COMMISSIONER REDENBAUGH: Madam Chair?                                                                                                              |
| 21 | CHAIRPERSON BERRY: Yes.                                                                                                                            |
| 22 | COMMISSIONER REDENBAUGH: I'm sorry, but                                                                                                            |
| 23 | I need to go to a meeting at this time, so I'll be                                                                                                 |
| 24 | leaving now.                                                                                                                                       |
| 25 | CHAIRPERSON BERRY: I understand. And I                                                                                                             |

And this decision was -- it should be of particular emphasis and importance to this Commission, because in 1996 the Commission published a report entitled "Federal Title VI Enforcement to Ensure Non-Discrimination in Federally-Assisted Programs," and found -- and I will read from that report -- that the overall Title VI enforcement efforts by federal agencies remain inadequate.

The report further concluded that if the 9 10 failures and deficiencies cited in this report are not 11 addressed properly, many individuals excluded from participating in or otherwise affected by federally-12 13 assisted programs, will continue to face discrimination or the denial of equal opportunities 14 because of their race, ethnicity, or national origin. 15

107 dissent is in the an action 1 suggested under Section 1983, which also is -- makes it possible for 2 3 actions to be brought challenging constitutional violations by state and local authorities. 4 But 1983 is limited to those state and local authorities. 5 It would not reach discrimination by private contractors, 6 7 for example, that receive federal funding. And so as we look at this decision, we 8 9 see that it raises issues 'that are of unique 10 importance to this Commission. It appears it will 11 have a very devastating impact on the ability of 12 individuals to enforce Title VI of the Civil Rights 13 Act. 14 CHAIRPERSON BERRY: Thank you. 15 Vice Chair? lό VICE CHAIR REYNOSO: Madam Chair, this is 17 only the last of a series of, in my view, disgraceful 18 and shameful opinions by the U.S. Supreme Court. Not 19 surprisingly, 20, 30 years ago, African-American and 20 other communities had a high regard for the judiciary, particularly the federal judiciary. 21 22 Most indicated that up to 90 percent of 23 African-Americans had a great deal of confidence in 24 the judiciary. It's sad to say that The L.A. Times 25 just had a poll not long ago; those rates are **NEAL R. GROSS** COURT REPORTERS AND TRANSCRIBERS 1323 RHODE ISLAND AVE., N.W.

| 21 | can't bring those actions.                                                                                                                         |
| 22 | This law has been interpreted completely                                                                                                           |
| 23 | to the contrary, by now, a great majority of Court of                                                                                              |
| 24 | Appeal opinions. It was considered established law,                                                                                                |
| 25 | and, belatedly, the Supreme Court now changes the                                                                                                  |

| 2  | In any case, I would like to continue                         |
| 3  | this very much like to continue this discussion,              |
| 4  | but I would like to do it after we've had a chance            |
| 5  | we've had some material from the Office of the General        |
| 6  | Counsel, as well as having had a chance to read the           |
| 7  | decision ourselves, and any other pertinent decisions         |
| 8  | that you would like to discuss.                               |
| 9  | CHAIRPERSON BERRY: I'm going to indulge                       |
| 10 | myself again. And if anyone wishes to stop me, you            |
| 11 | may kick me, Cruz.                                            |
| 12 | First of all, I assume that members of                        |
| 13 | this Commission read the newspapers and are aware of          |
| 14 | the news concerning civil rights, and that no one has         |
| 15 | to tell them that some major Supreme Court decision           |
| 16 | has been handed down in the area of civil rights.             |
| 17 | Just as I read this decision on the                           |
| 18 | morning that it was in the paper, I would assume that         |
| 19 | anyone who has a deep interest in civil rights it             |
| 20 | was front page, headline news in the newspaper. It's          |
| 21 | not like it was obscure or hidden over behind                 |
| 22 | something where you couldn't find it, without anyone          |
| 23 | telling them.                                                 |
| 24 | I would assume that members of this                           |
| 25 | Commission maybe my assumptions are just crazy                |

would be interested in any major thing that occurred that had to do with civil rights. That's why we're on this Commission. That's why we make sacrifices to be involved in it. And that I have a reasonable expectation to be able to engage in dialogue with my colleagues.

They now know the specificity. In fact, they may not actually read the opinion, but there are excerpts in the newspapers. So that they would have some familiarity with a case, without somebody having to call them up or e-mail them to say, "There is a case, and here it is," and whatever.

So I'm just saying that for everybody, not just for you, Commissioner Thernstrom. I mean everybody here. So I don't believe that I have to -or the Staff Director has to call your attention to some major episode concerning civil rights.

And that your curiosity would lead you to ask your special assistant or somebody, if you have one, to get that information for you and to brief you on it, so that when you came to the Commission meeting you would have some awareness of it and not act as if you never heard of it, or if you did you don't know anything about it.

| 5  | that's one of the incredible ironies of this.                                                                                                      |
| 6  | And then the third thing I would say is                                                                                                            |

| 11 | the cases before that, however one wants to                                                                                                        |
| 12 | characterize it, was that everyone understood that                                                                                                 |

| 14 | VICE CHAIR REYNOSO: That's right.                                                                                                                  |
| 15 | CHAIRPERSON BERRY: That's what the case                                                                                                            |
| 16 | law shows.                                                                                                                                         |
| 17 | And then the last thing I'll say is those                                                                                                          |

| 4 | money."                                             |

And now we're in a position where, given 5 6 that court decision, it is entirely possible that 7 taxpayers' money can go to either individuals, organizations, or institutions that will discriminate. 8 9 And also, the history of African-10 Americans -- to go to that history -- in this country is that for years and years we were told -- my mother 11 laughs every time somebody says, "You've got to prove 12 13 intent before you can do anything." People would do 14 all sorts of things to us as a people, and then laugh 15 and say, "You can't prove I intended to do it. Ha, ha, ha." As if that was a big joke. 16

And so what disparate impact does is it makes it possible for you to try to prove something so that the "ha, ha, ha" is no longer viable.

So for all of those reasons, without knowing chapter and verse, I do know what I read in the paper, and I did read the case, and I did hear a discussion of it in the media, I think that what we are hearing is to ask the General Counsel and the staff to put together something on this case, but not

| 3  | people will get the same benefit as we do.                                                                                                         |
| 4  | So I'd like to do it as a briefing, not                                                                                                            |
| 5  | just a report that is submitted to us, like the                                                                                                    |
| 6  | previous one. I know it's more work for you, but,                                                                                                  |
| 7  | what the heck?                                                                                                                                     |
| 8  | CHAIRPERSON BERRY: Yes, okay.                                                                                                                      |
| 9  | Yes, Commissioner Thernstrom?                                                                                                                      |
| 10 | COMMISSIONER THERNSTROM: Well, I do, in                                                                                                            |
| 11 | general, read Supreme Court decisions involving civil                                                                                              |
| 12 | rights. This came down on the 24th of April. I                                                                                                     |
| 13 | • haven't had time to do so yet, and this is not an item                                                                                           |
| 14 | on the agenda for this Commission meeting, or I                                                                                                    |
| 15 | certainly would have prepared myself so that I had,                                                                                                |
| 16 | indeed, read it.                                                                                                                                   |
| 17 | So that I don't think it's correct to say                                                                                                          |
| 18 | that in some way, or to suggest that in some way                                                                                                   |
| 19 | Commissioners, the day a Supreme Court decision comes                                                                                              |
| 20 | out, should, you know, have it under their belt.                                                                                                   |
| 21 | Let me just reiterate, because I can't                                                                                                             |
| 22 | quite let it go, on the Voting Rights Act Madam                                                                                                    |
| 23 | Chair, the statement you made. The Supreme Court                                                                                                   |
| 24 | 14th Amendment decision that triggered the 1982                                                                                                    |
| 25 | amendment simply lined voting rights law up with                                                                                                   |

| 1   | existing 14th Amendment decisions. That was it did                                                                                                 |
| 2   | nothing more than that. It triggered an amendment.                                                                                                 |
| 3   | The amendment changed the Act. That's fine. But, you                                                                                               |
| 4   | know, I think we should get the record straight on                                                                                                 |
| 5   | exactly what happened.                                                                                                                             |
| 6   | In any case, I think we should have time                                                                                                           |
| 7   | all of us should have the chance to we now know                                                                                                    |

| 17  | or anything else in my view was inconsistent with                                                                                                  |
| 18  | what they decided.                                                                                                                                 |
| 19  | And voting rights lawyers were shocked                                                                                                             |
| .20 | because they had gone so far in minority voter                                                                                                     |
| 21  | dilution claims that they didn't imagine that that                                                                                                 |
| 22  | would happen. And the shock was heard around the                                                                                                   |
| 23  | city, which is one reason why the Congress hurried up                                                                                              |
| 24  | there.                                                                                                                                             |
| 25  | And the record will show that the                                                                                                                  |

| 16 | be a report just analyzing the decisions and have                                                                                                  |
| 17 | somebody come to have a briefing to discuss it.                                                                                                    |
| 18 | But we'd like to have something by the                                                                                                             |
| 19 | end of the and it may not be possible to have a                                                                                                    |
| 20 | briefing, because we can't have one in June. And the                                                                                               |
| 21 | Supreme Court session will be over unless they                                                                                                     |
| 22 | change, they'll go home in July, won't they? They've                                                                                               |
| 23 | been doing that.                                                                                                                                   |
| 24 | And so who will want to do it at the end                                                                                                           |
| 25 | of the session? We're going to have to agree that                                                                                                  |

| 1  | report we've been discussing, the Hawaii Report, in .                                                                                              |
| 2  | that it's a much shorter report, a very different                                                                                                  |
| 3  | report. It doesn't have the findings and                                                                                                           |
| 4  | recommendations and stuff like that.                                                                                                               |
| 5  | The only thing I perhaps kind of just                                                                                                              |
| 6  | want to add as an introduction of course, I'll try                                                                                                 |
| 7  | to answer questions if the Commission has any is                                                                                                   |
| 8  | that somewhere early in the report, I believe it was                                                                                               |
| 9  | on I thought it was on page 2, but, yes, it says                                                                                                   |
| 10 | that Asian-Pacific Islanders were the second-largest                                                                                               |
| 11 | racial minority. That was a mistake. It should say                                                                                                 |
| 12 | third-largest minority.                                                                                                                            |
| 13 | But other than that, I will just be                                                                                                                |

| 21 | CHAIRPERSON BERRY: All in favor indicate                                                                                                           |
| 22 | by saying aye.                                                                                                                                     |
| 23 | (Chorus of ayes.)                                                                                                                                  |
| 24 | Then we have the Montana SAC Report. Do                                                                                                            |
| 25 | you want to say something about it? And then I have                                                                                                |

| 1  | something I'd like to say.                                                                                                                         |
| 2  | STAFF DIRECTOR JIN: No. Only I think                                                                                                               |
| 3  | the obvious to the Commissioners that, you know, it's                                                                                              |
| 4  | a they talked to a lot of different people about                                                                                                   |
| 5  | Native American education issues in Montana, and there                                                                                             |
| 6  | were some recommendations at the end that seemed like                                                                                              |
| 7  | they were worthwhile.                                                                                                                              |
| 8  | CHAIRPERSON BERRY: And the report I                                                                                                                |
| 9  | thought was very interesting in that it discussed over                                                                                             |
| 10 | time how negative stereotyping impacts progress, which                                                                                             |
| 11 | is one of the issues that we discussed when we were                                                                                                |
| 12 | talking about the Native American names and mascots                                                                                                |
| 13 | issue, where we let we issued the statement last                                                                                                   |
| 14 | time. I thought that was very interesting                                                                                                          |
| 15 | information.                                                                                                                                       |
| 16 | And then, the fact that they had these                                                                                                             |
| 17 | followup meetings, a study and then a followup                                                                                                     |
| 18 | meeting, in Billings, I thought that was interesting,                                                                                              |
| 19 | and then the interviews. The way they went about it I                                                                                              |
| 20 | thought was very good.                                                                                                                             |
| 21 | And the recommendations about teachers                                                                                                             |
| 22 | taking human relations courses, specifically Native                                                                                                |
| 23 | American studies, I thought that that would be very,                                                                                               |
| 24 | very good.                                                                                                                                         |
| 25 | One of the things I noticed one time I                                                                                                             |

|----------------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| 1              | went through Montana well, let me let you speak, 4                                                                                                 |
| 2              | and then I'll finish what I'm saying, Commissioner                                                                                                 |
| 3              | Meeks.                                                                                                                                             |
| 4              | COMMISSIONER MEEKS: Okay. Thank you.                                                                                                               |
| . <sup>5</sup> | I believe that the SAC began this work in                                                                                                          |
| 6              | 1997 is what the report said, and in this this past                                                                                                |
| 7              | November, the Montana Office of Public Instruction put                                                                                             |
| 8              | out a newspaper about Indian education in the state.                                                                                               |
| 9              | And, actually, they adopted eight of the                                                                                                           |
| 10             | nine recommendations that were offered by this SAC                                                                                                 |
| 11             | report. So I believe the SAC was right on, and I                                                                                                   |
| 12             | commend their work on this.                                                                                                                        |
| 13             | CHAIRPERSON BERRY: Well, that's                                                                                                                    |
| 14             | fantastic. Good. Because I thought the                                                                                                             |
| 15             | recommendation was so reasonable that I couldn't                                                                                                   |
| 16             | understand how anybody would, you know, disagree that                                                                                              |
| 17             | they should happen. And so it's important work that                                                                                                |
| 18             | the SAC does, and there are important issues related                                                                                               |
| 19             | to Native Americans.                                                                                                                               |
| 20             | I have friends who are from Montana, who                                                                                                           |

| 22             | who live in Montana, been in Montana their whole                                                                                                   |
| 23             | lives. And they explained that throughout their                                                                                                    |
| 24             | growing up and education in Montana that they learned                                                                                              |
| 25             | very little about the Native American population of                                                                                                |

| 6 · | So I thought this was very interesting.                                                                                                            |
| 7   | Yes, Commissioner Wilson?                                                                                                                          |
| 8   | COMMISSIONER WILSON: Thank you, Madam                                                                                                              |
| 9   | Chair. I just wanted to commend the SAC report on the                                                                                              |

| 3   | on education issues, and about the importance of                                                                                                   |
| 4   | keeping those issues in mind during this debate that's                                                                                             |
| 5   | going on on the educational bill on the Hill.                                                                                                      |
| 6   | And I ticked off the things we discussed,                                                                                                          |
| 7   | like high stakes testing and bilingual education. And                                                                                              |
| 8   | the thing that stuck in my mind about bilingual was to                                                                                             |
| 9   | remember that 90 percent of the people who are in                                                                                                  |
| 10  | supposed bilingual education aren't really. Remember                                                                                               |
| 11  | they told us that, that when people go out assessing                                                                                               |
| 12  | bilingual education programs, they're not really                                                                                                   |
| 13  | bilingual?                                                                                                                                         |
| 14  | And pointing out the need to make the OCR                                                                                                          |
| 15  | and the Department of Education enforce the civil                                                                                                  |
| 16  | rights laws when it comes to education. And I wanted                                                                                               |
| 1-  | you to know that, and I was trying to figure out                                                                                                   |
| 18  | and we sent copies of the letter up to and we                                                                                                      |
| 19  | pointed out that school choice initiatives should not                                                                                              |
| 20  | exacerbate resource inequalities.                                                                                                                  |
| 21  | So it was a summary of all the different                                                                                                           |
| 22  | items that we discussed. Testing should be used for                                                                                                |
| 23  | assessment, and so on. If you didn't get a copy of                                                                                                 |
| 24. | the letter, you should have one. And then we had it                                                                                                |
| 25  | sent up to the ranking members and the chairs of the                                                                                               |
